## Create an Account

- Create a Group: [YMR-24KW28]
- Create a Project: [GitLab-Beginner]

## Create new project

### Create blank project

Create a blank project to store your files, plan your work, and collaborate on code, among other things.

### Create from template

Create a project pre-populated with the necessary files to get you started quickly.

### Import project

Migrate your data from an external source like GitHub, Bitbucket, or another instance of GitLab.

### Run CI/CD for external repository

Connect your external repository to GitLab CI/CD.

You can also create a project from the command line. [Show command](#)
